Setting up Jupyter Notebooks

April, 2017

OVERVIEW

Students registered to the Computer Programming Lab are kindly asked to follow this tutorial to configure their computers.

MAC OS X

This installation is very similar to what is done in the following video

https://www.youtube.com/watch?v=Habh6W7-FPI

Please read carefully below to understand where our installation and configuration differs from the video tutorial.

1. Go to this URL: https://www.continuum.io/downloads#osx and select the Graphical Installer for the Python 3.6 version.
2. The executable should be available in your Downloads directory. ((Required space ~ 2.0 GB)
3. Like in the video, run it and make sure that Anaconda gets installed to your Applications directory.
4. The Navigator will be your portal to launching Jupyter Notebooks.
5. By default, Jupyter will be launched from your home directory
